## GPA Calculation Chart

| Letter Grade | Numerical Grade | Points | DE Weighted Points |
| :---: | :---: | :---: | :---: |
| A | $100-90$ | 4 | 5 |
| B | $89-80$ | 3 | 4 |
| C | $79-70$ | 2 | 3 |
| D | $69-60$ | 1 | 2 |
| F | $59-0$ | 0 | 0 |

To calculate a cumulative GPA, add points and/or weighted points of all classes. Divide this sum by the number of classes.

For example, a student earned the following scores and points in these classes in one academic year:

| DE English | 97 | 5 |
| :--- | :--- | :--- |
| Algebra 1 | 84 | 3 |
| World Hy | 92 | 4 |
| Physical Sc | 89 | 3 |
| Career Prep | 100 | 4 |
| PE | 100 | 4 |
| Keyboarding | 98 | 4 |
| $\mathbf{5 + 3 + 4} \mathbf{+ 3 + 4 + 4 + 4 = \mathbf { 2 7 }}$ |  |  |
| $\mathbf{2 7 / 7}=\mathbf{3 . 8 5 7}$ |  |  |

For a cumulative 9-12 GPA, do this for each year, add the 4 GPAs, and divide by 4.
